

# DESIGN AND DEVELOPMENT OF AN AI-POWERED CAREER PREPARATION APPLICATION FOR GRADUATING COLLEGE STUDENTS

Robert Jeremy Bicara

Jenard Reyes

Jayvee Uribe

# Introduction

Graduating students often face challenges in preparing for employment despite completing their academic requirements. Many struggle with resume writing, interview preparation, and identifying the skills employers expect. This study proposes an AI-powered career preparation application that enhances job readiness through resume analysis, mock interviews, skills assessments, and personalized career recommendations.

# Development Approach

We will use the **Agile Software Development Methodology** because it allows the team to develop the application in phases, test each feature, and continuously improve the system based on user feedback.

# Development Phases

- 01 Planning and Requirements Gathering

---
- 02 System Design

---
- 03 Application Development

---
- 04 Testing

---
- 05 Deployment and Evaluation

# Core Features

1. **User Registration/Login**
2. **User Profile**
3. **Resume Upload and AI Analysis**
4. **AI Mock Interview**
5. **Skills Assessment**
6. **Career Readiness Dashboard**
7. **AI Recommendations**

# Technology Stack

## ↪ Mobile Development

Flutter(Dart

## ↪ Backend:

[Node.js](#) + [Express.js](#)

## ↪ Data Base:

Firebase Firestore

## ↪ Authentication:

FireBase Authentication

## ↪ AI Integration:

OpenAI API or Google Gemini API

## ↪ UI/UX Design:

Figma

## ↪ Version Control:

Git & Github
